Section-B

II. A. Prose Comprehension: 5x2=10

Read the following paragraph and answer the questions given below:

Water

Water is vital, or needed, for life on earth. All animals and plants need water to survive. Plants and animals that live on land can get water from streams, rivers, lakes, puddles, dew or rain. Water is so vital for human life. People collect and store water for drinking and washing, for our pets and farm animals, and for supplying water to crops. Each person needs to take in about two

quarts of water daily to stay alive and healthy. Water can be found in three forms. They are solid, liquid and gas. The liquid form is the normal water we drink. The solid form is ice, that exists in very cold places and the gaseous form, is water vapour, that exists in the air. Water vapour also exists in steam produced from hot springs or geysers.

Answer the following:

5. Name the three forms of water.
6. Name some places from where do we get water.
7. Give the examples of solids and gaseous form of water?
8. What are the two uses of water?
9. How much water is needed to stay alive and healthy?
